County to Conduct Light-Level Testing at Hal and Berni Hanson Regional Park

Loudoun County has scheduled light-level testing in the evening hours at the new Hal and Berni Hanson Regional Park athletic fields for two weeks beginning Monday, June 13, 2022, weather permitting. Residents will notice increased activity at the park prior to the testing date.

During the light-level testing, athletic field lights will be turned on and off and dimmed. The county will begin testing at dusk and will continue for several hours. If inclement weather delays testing, plans call for tests to continue each successive workday following June 13 until the testing can be completed.

This light-level testing is part of the ongoing project to construct a new, 257-acre regional park located on Evergreen Mills Road in Arcola, between the Brambleton and Willowsford communities. The park will be operated by the Loudoun County Department of Parks, Recreation and Community Services (PRCS). Construction is estimated to be completed in June 2022. Furniture and equipment will then be installed and PRCS will begin readying the park for its opening.
