

Route 50 Traffic Pattern Shift Scheduled for Wednesday, January 16

VDOT has informed me that there will be a shift in the traffic on Route 50 beginning **Wednesday, January 16** (weather permitting). Eastbound Route 50 traffic from just east of Tall Cedars Parkway through the intersection at Pleasant Valley Road will be diverted approximately 50 feet to the south. This shift will be fully operational by the morning of Thursday, January 17.

Access to or from any of the side streets or entrances will not be impacted. As with any change in traffic pattern, you may want to allow a little extra time as drivers become accustomed to the shifted lanes.

Day Time Lane Closures on Route 606

VDOT has begun a project that must be done during the day and will require intermittent lane closures on Route 606 between the hours of 9:00 a.m. and 3:00 p.m. All work will take place between the Loudoun Valley Estates III community and the Dulles Greenway. Weather permitting, this project should be completed by Thursday, January 17. VDOT will monitor traffic delays and to the extent they are able try not to let traffic build up too much while they are working.
