LOUDOUN COUNTY CHAMBER OF COMMERCE®
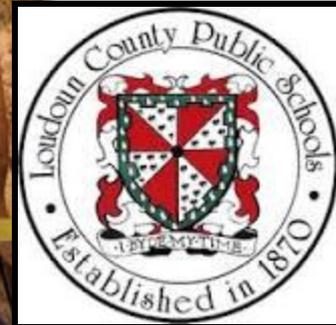

LCSO BEGINS PILOT PROGRAM TO EQUIP DEPUTIES WITH NASAL NARCAN

This program is part of the comprehensive approach of the

Heroin Operations Team (HOT) initiative announced by Sheriff Chapman and Rep. Comstock in April 2015.

All of LCSO deputies assigned to western Loudoun have been trained in and equipped with the use of NARCAN, a life saving tool when seconds count.

What is NARCAN?

Nasal NARCAN is a nasal form of the drug naloxone that can reverse the effects of opiates such as heroin, oxycodone and hydrocodone.

LCSO TEU Heroin Initiative

Sgt. Paul Loconti
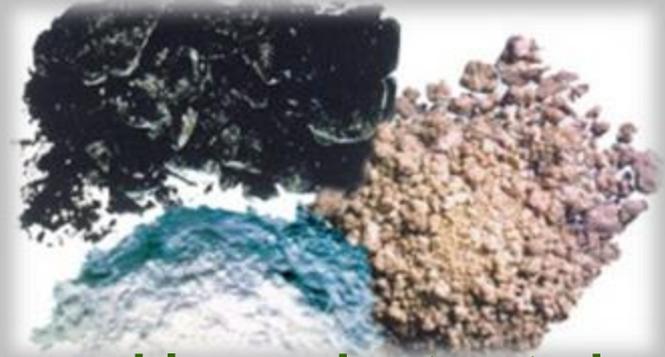

HEROIN

- An opiate (narcotic) drug processed from morphine and extracted from certain poppy plants.

- Heroin comes in a white or brownish powder, or a black sticky substance known as "black tar heroin."

- Often "cut" with other drugs or substances such as sugar, powdered milk, lactose powder, inositol powder, vitamin B powders, or synthetic opiate substitutes like fentanyl, which can be up to 100 times more powerful than morphine.

- User is unaware how much actual heroin is being used, creating possibility of an overdose.

ALL OPIOIDS

All opioids (heroin and/or one or more prescription opioids) make up 70-75% of all fatal drug overdoses annually in Virginia. Fatal opioid overdoses often have one or more benzodiazepines contributing to death (28.1%).

[1] 'All Opioids' include heroin, prescription opioids, and opioids unspecified
[2] 'Opioids Unspecified' are a small category of deaths in which the determination of heroin and/or one or more prescription opioids cannot be made due to specific circumstances of the death. Most commonly, these circumstances are a result of death several days after an overdose, in which the OCME cannot test for toxicology because the substances have been metabolized out of the decedent's system.
