## SELECTED ECONOMIC CHARACTERISTICS

## 2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Dulles district, Loudoun County, Virginia				
	Estimate	Margin of Error	Percent	Percent Margin of Error	
EMPLOYMENT STATUS					
Population 16 years and over	35,987	+/-1,002	35,987	(X)	
In labor force	28,515	+/-834	79.2%	+/-1.4	
Civilian labor force	28,243	+/-834	78.5%	+/-1.4	
Employed	27,248	+/-796	75.7%	+/-1.4	
Unemployed	995	+/-214	2.8%	+/-0.6	
Armed Forces	272	+/-133	0.8%	+/-0.4	
Not in labor force	7,472	+/-591	20.8%	+/-1.4	
Civilian labor force	28,243	+/-834	28,243	(X)	
Unemployment Rate	(X)	(X)	3.5%	+/-0.7	
Females 16 years and over	18,419	+/-672	18,419	(X)	
In labor force	13,050	+/-523	70.9%	+/-2.0	
Civilian labor force	13,041	+/-524	70.8%	+/-2.0	
Employed	12,532	+/-517	68.0%	+/-2.1	
Own children of the householder under 6 years	5,363	+/-408	5,363	(X)	
All parents in family in labor force	3,615	+/-445	67.4%	+/-5.7	
Own children of the householder 6 to 17 years	11,739	+/-492	11,739	(X)	
All parents in family in labor force	8,767	+/-614	74.7%	+/-3.8	
COMMUTING TO WORK					
Workers 16 years and over	27,036	+/-787	27,036	(X)	
Car, truck, or van drove alone	21,438	+/-689	79.3%	+/-1.8	
Car, truck, or van carpooled	2,324	+/-416	8.6%	+/-1.5	
Public transportation (excluding taxicab)	1,141	+/-207	4.2%	+/-0.7	
Walked	121	+/-76	0.4%	+/-0.3	
Other means	202	+/-113	0.7%	+/-0.4	
Worked at home	1,810	+/-275	6.7%	+/-1.0

People in families	(X)	(X)	1.9%	+/-0.8	
Unrelated individuals 15 years and over	(X)	(X)	10.9%	+/-3.5	

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

Workers include members of the Armed Forces and civilians who were at work last week.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2012-2016 tables, industry data in the multiyear files (2012-2016) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at https://www.census.gov/people/io/methodology/.

Logical coverage edits applying a rules-based assignment of Medicaid, Medicare and military health coverage were added as of 2009 -- please see https://www.census.gov/library/working-papers/2010/demo/coverage\_edits\_final.html for more details. The 2008 data table in American FactFinder does not incorporate these edits. Therefore, the estimates that appear in these tables are not comparable to the estimates in the 2009 and later tables. Select geographies of 2008 data comparable to the 2009 and later tables are available at https://www.census.gov/data/tables/time-series/acs/1-year-re-run-health-insurance.html. The health insurance coverage category names were modified in 2010. See https://www.census.gov/topics/health/health-insurance/about/glossary.html#par\_textimage\_18 for a list of the insurance type definitions.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

## Explanation of Symbols:

- 1. An '\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
- 2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
  - 3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
  - 4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
- 5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
  - 6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
- 7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
  - 8. An '(X)' means that the estimate is not applicable or not available.
